

HANDOUT 4.4 C - MÄRCHENSTRASSE POWERPOINT WORKSHEET

You have just gone with Annalena and her family on a vacation trip on the *Märchenstraße* (Fairytale Road) and to visit her grandparents in the small city of Vechta in Lower Saxony.

Using the Powerpoint Narrative, answer the following questions:

1. How much did the family spend on their vacation? First compute this in euro (€) and then using the conversion rate that 1 euro (€) = \$ 1.45, compute how much they spent in dollars?
2. The temperature for each day of the trip was given in Celsius. What was the temperature in Fahrenheit? (Do you remember the formula? $Fahrenheit = \frac{9}{5} \times Celsius + 32$)
3. Europeans use a 24-hour clock to indicate time. In other words, 1 pm is presented as 13:00. Review all the railroad schedules and indicate what time the trains left and arrived and how long the train trips took.
4. What are the different foods which Annalena and her family ate while on their trip? Are any of these foods similar to what you eat in the United States? Which are different? Do you notice anything interesting about the variety of food?
5. What are the different types of transportation that the family uses on their vacation? Are these similar to what you use in the United States? Which are the same and which are different?
6. What fairy tale characters are mentioned on the trip? Are all of these familiar to you? Which were not? Which is your favorite and why?
