

# Topic1      Physical Geography of Germany

## Lesson 5      What did I see when I visited Germany?

**Lesson Objective**

The student will deal with geographical features of Germany.

**Materials and Resources**

■ Worksheet 4      “Letter From Germany”

**Strategies**

Assign students to groups of three or four members. Ask each group to fill in the blanks to **Worksheet 4 “Letter From Germany”**. As enrichment (or for high achieving students) have the groups compose their own one-page letter about a fictional vacation trip through Germany. It should include specific information about cities, routes and recreation sites. These letters could then be exchanged with those from other groups to check for geographic accuracy.
